Overview of Cochenille Webinar Videos

Webinar videos are in .mp4 format, and are typically between 1 and 2 hours in length. They include instructional information as well as Q&A from past webinars. These videos serve as a great tool for learning your software, design principles and concepts, and they include lots of inspiration. Price per video is $25.00.

Garment Designer

Walking Tour of Garment Designer

Susan will show you Garment Designer's main attractions as well as help you discover destinations you may not have known existed. Stroll through Garment Designer's menus, shortcuts and capabilities to help you gain a sense of direction when navigating our program! For new or users who want a refresher.

I've Opened the Box, Now What? An Intro to Garment Designer

This webinar is for people who are basically just starting, or who need a complete refresher on how to approach creating garment patterns with Garment Designer. It's time to get going, so let's walk through the steps of thought, measurement basics, and so on.

Knitting 1,2,3

In this webinar video, you will learn how to use Garment Designer to design a knit project. This webinar will help you master the Shaping Instructions, generate shaping charts for regular, top-down, bottom-up, sideways and diagonal knitting. You will learn tips and tweaks to make your next knitting project a breeze.

Stitch Painter

Let's Do a Project! An Introduction to Stitch Painter

Are you a new Stitch Painter user? Maybe you need a refresher? This webinar will demonstrate the basic workings of Stitch Painter, Cochenille's Stitch Design program. This program can also be used for Beading, Stitchery, Mosaics or any graph based design. Learn how to approach a project, use the Tools, Repeat, and other basic menus.

General Pattern Making

Twenty Pattern Guidelines

If you alter or create your own patterns, then it's time you increase your knowledge of pattern rules that professionals know and understand. In the class you will see how simple it can be...if you understand the basics. Study the anatomy of a pattern, learn how to change it properly and how to relate ease to fit. This is a great webinar to review or learn important patterning fundamentals. Garment Designer will be used to demonstrate examples.

Armhole Sleeve Relationships

If you alter patterns, or want to draft them 'from scratch', Susan will teach you the basics of armhole and sleeve combinations. Understand how changes made to the armhole affect the sleeve and enjoy learning how to draft/create a multitude of sleeve styles. Garment Designer will be used to demonstrate examples.

Webinar Descriptions

The Art of Taking Measurements
This webinar focuses on the art of taking measurements properly and accurately, for Garment Designer and general pattern making. It will also cover what part of the pattern a measurement affects, and how better fit can be achieved, with the proper measurement in place.

Design and Translating Images to Patterns

From Fashion Windows To Actual Garments Inspiration from Italy and France
From Fashion Windows to Actual Garments webinar will take you through the process of analyzing the fashions you see in store windows, online or elsewhere and then building the pattern in Garment Designer.
 A series of different garments will be shown and used in this workshop. You will learn how to interpret the styles and how to creatively use your software to make the pattern.

From the Streets of Kyoto to Tokyo Japan, using Garment Designer
In this webinar, you will see fashions in Tokyo and Kyoto, Japan. See what is in the store windows and on the street. Then, using Garment Designer, learn how to build patterns for some of these garments. We will stretch your mind by choosing garments that are creative in their design and/or require a slightly different approach in Garment Designer.
